

Expert Animation Services for Automotive Accident Cases

Our Process

Set up our first call

Any preliminary photos and overview of the case prior to our first meeting helps us quickly form accurate work estimates.

Discuss budget and case components

Please provide:

- Depositions
- Police reports
- Photos
- All other relevant documentation

Receive project authorization

If additional tradeoffs may be considered, we agree on any potential tradeoffs before beginning any work.

Iterate over early feedback

We like to receive feedback early and always deliver under-budget to ensure the remaining budget is wisely focused.

Deliver final animation

Our final animations include engineer-focused precision, Hollywood-style cinematography, and immersive sound design that trigger the intended emotional responses.

Personalized

Each animation is done to match a specific budget while still expressing the facts of the case.

Objective

Our animations heavily rely on both sets of depositions, police reports, and photographs.

Authentic

We bring to life traumatic experiences that have traditionally been challenging to accurately and objectively describe.

We incorporate our expertise, the latest technology, and all available information to craft an impactful visual representation of transpired events. This ensures clarity during your negotiations to secure the best possible outcome for your clients.
